Profile
I'm a web developer with a daily dedication towards studying web programming languages, their frameworks and the best practices for creating performant, secure and efficient systems.

I am always looking forward on applying my knowledge to projects that can provide a solution to a problem and cause a positive experience for the user.

I'm always willing to take on new challenges and expand my knowledge in the field, constantly looking for the most efficient and practical way to program new solutions.

Technologies
- HTML, CSS and Tailwind
- TypeScript & Javascript
- React & Next.js
- NodeJS & Express
- MongoDB, MySQL and SQLite
- Git & GitHub

Featured projects
Scriptorium
A software that offers users the ability to create tests, quizzes and questions on any subject for an easy and customizable study environment.
